NavalX serves as the Department of Navy (DON) workforce "super-connector," focused on scaling non-traditional agility methods across the DON workforce. We create organizational agility by empowering the workforce to solve problems and help build partnerships and networks to enable greater collaboration on warfighter needs.

Tech Bridges: Tech Bridges mitigates these barriers by offering easy access collaboration spaces in commercial business parks to build productive partnerships and networks to accelerate delivery of dual use solutions to the warfighter.

Centers for Adaptive Warfighting: We are institutionalizing and expanding learning opportunities, information sharing, and agility training in industry best practices to drive change at all levels.

Playbooks: One of NavalX's missions is to find, share and facilitate the rapid adoption of proven agility enhances methods that are ready for implementation, have broad applicability and are likely to scale.

Digital Agility: We are not the authority on Digital and we take guidance that to the DON CIO, but we are able to assist teams in piloting tools or break thru some of the policy or bureaucracy that surrounds digital tools in the government.

Agility and Adaptability Awards: Our goal and mission is to recognize top Department of the Navy (DON) individuals or teams who demonstrate dedication and leadership in increasing agility and accountability within the DON.

**Our vision is an agile, collaborative &
connected Naval network.**
